

# What does the solution include?

## FLEET TRACKING PLATFORM

Manage devices, visualise data and turn it into actionable insights.

## NETWORK CONNECTIVITY

Access to the Spark IoT network.

## DEVICES

Choose the right device to suit your needs.

### BOLT OBD

Compact and affordable vehicle tracking device featuring simple plug and play installation for fleet management, driver safety and behaviour monitoring.

### G5-E02

No OBD-II port? No worries. The G5-E02 is designed for fleet management of vehicles without an OBD-II port or where it is not a preferred option.

## Dedicated NZ-based support when you need it.

We have a designated IoT team and Business Development Managers across the country. They're ready to support IoT deployment for your business.

# Fleet Tracking with Spark IoT

## Keep your staff safe and gain insight into vehicle utilisation

You have leased or purchased vehicles for a purpose. If left untracked, you have no simple way to ensure those vehicles are being used for their intended purpose and in a way that is safe and sustainable.

### How Fleet Tracking can work for you.

#### Key benefits:

-  **Improve Visibility**  
View vehicle location and status on a map.
-  **Promote Staff Safety**  
Encourage safer driving habits.
-  **Transparency**  
Ensure vehicles are used as intended.
-  **Cost reduction**  
Optimise utilisation of vehicles and reduce risk of road accidents.
-  **Save time**  
Reduce admin time with automated reporting and compliance reminders.

#### Key features:

- ✓ Fleet Tracking device options to match your vehicle design, including an easy self-install option.
- ✓ 24/7 fleet visibility with ability to locate vehicles on a map or view their trip histories.
- ✓ Comprehensive reporting including speed, utilisation, geofenced location and maintenance.
- ✓ User-defined exception alerts to give you insight into vehicle utilisation.

# Fleet Tracking

There are two subscription plans available. You can also pay an extra fee for add-ons to suit your business needs.
