# Fleet Tracking with Spark IoT

## Keep your staff safe and gain insight into vehicle utilisation

You have leased or purchased vehicles for a purpose. If left untracked, you have no simple way to ensure those vehicles are being used for their intended purpose and in a way that is safe and sustainable.

### How Fleet Tracking can work for you.

#### Key benefits:

##### **Improve Visibility**

View vehicle location and status on a map.

##### **Promote Staff Safety**

Encourage safer driving habits.

##### **Transparency**

Ensure vehicles are used as intended.

##### **Cost reduction**

Optimise utilisation of vehicles and reduce risk of road accidents.

##### **Save time**

Reduce admin time with automated reporting and compliance reminders.

#### Key features:

- ✓ Fleet Tracking device options to match your vehicle design, including an easy self-install option.
- ✓ 24/7 fleet visibility with ability to locate vehicles on a map or view their trip histories.
- ✓ Comprehensive reporting including speed, utilisation, geofenced location and maintenance.
- ✓ User-defined exception alerts to give you insight into vehicle utilisation.
- ✓ Pool Booking provides a simple way to automate pool fleet administration.

Spark Fleet Tracking can be used in light passenger vehicles, utes, vans and delivery trucks.

# Fleet Tracking

There are two subscription plans available. You can also pay an extra fee for add-ons to suit your business needs.

## Fleet Lite Base Plan

For your everyday tracking needs.

- ✓ 24/7 Visibility of fleet

## Fleet Plus Add-Ons

RUC reminders

RUCOR reminders

Inspections tool

Pool Booking

## Pool Booking Add-On

The simple way to automate your booking system for staff & customers.

### Manage bookings

Self-service booking system embedded with clever telematics, so administrators only need to handle escalations.

### Reduce leasing fees

Automatic allocation of bookings to underutilised vehicles, minimising overage leasing fees.

### Right size your fleet

Gain insights from peak utilisation charts, helping you to optimise the size of your fleet to your business needs.

# What does the solution include?

## FLEET TRACKING PLATFORM

Manage devices, visualise data and turn it into actionable insights.

## NETWORK CONNECTIVITY

Access to the Spark IoT network.

## DEVICES

Choose the right device to suit your needs.

### PLUG AND PLAY DEVICES

#### Bolt OBD - II

It can be installed by anyone making it easy when you roll out Spark Fleet and swap out vehicles.

### WIRED DEVICES

#### G62

Affordable wired device used for secured vehicle tracking.

#### G5-E02

For mobile plant such as diggers and forklifts or advanced tracking needs.

## Dedicated NZ-based support when you need it.

We have a designated IoT team and Business Development Managers across the country. They're ready to support IoT deployment for your business.
